

ABMS[®] Patient Safety Foundations

Learn the fundamentals of patient safety to improve patient care in your practice

- Curriculum covers essential topics in patient safety
- Awards 2.5 AMA PRA Category I credits
- Pre- and post-tests assess knowledge acquisition
- Counts towards ABMS Maintenance of Certification[®] and other patient safety requirements (based on ABMS Specialty Board requirements)
- Web-based program can be completed anywhere, any time

ABMS Patient Safety Foundations is an engaging Web-based self-assessment that covers patient safety curriculum in key topic areas of national concern. The course is worth 2.5 AMA PRA Category I credits, counts towards ABMS Maintenance of Certification[®], and may satisfy your state medical board, insurance panel or institution's requirements for patient safety curriculum.

Participating physicians will learn essential knowledge, skills and attitudes about patient safety that can improve patient care in any clinical environment. By taking this course, you will take an important step in acquiring the knowledge and skills to assess the safety of patient care, and to make that care safer.

Patient Safety Foundations

Four key topics comprehensively cover patient safety:

- Epidemiology of Safety and Harm
- Systems Approach to Improving Patient Safety
- Communication
- Safety Culture

Each module includes pre- and post- knowledge self-assessments
