

ABMS Member Board Focused Practice Designation

The focused practice designation, approved by ABMS in March 2017, recognizes the value that physicians who focus some or all their practice within a specific area of a specialty and/or subspecialty can provide to improving health care. Focused practice designation enables the ABMS Member Boards to set standards for, assess, and acknowledge additional expertise that physicians gain through clinical experience, and may include formal training. Visit the respective [Member Board's website](#) for more information about their area(s) of focused practice.

ABMS MEMBER BOARDS WITH APPROVED FOCUSED PRACTICE DESIGNATIONS
